The Board of Directors shall constitute itself, unless otherwise provided by law. The Chairman shall convene meetings of the Board of Directors if and when the need arises or upon the written request of any other member. Except in urgent cases, calling notices for meetings are to be sent out five days before the scheduled date of the meeting, stating the items for discussion.

Minutes are to be kept of the discussions, and are to be signed by the Chairman and the Secretary. The Board of Directors appoints a Secretary, who need not be a member of the Board of Directors. A majority of the Board of Directors must be present in order for resolutions to be validly adopted. Resolutions adopted in this way are to be included in the minutes.

There are usually six board meetings a year, each lasting about five hours. Members of the Executive Board will be called in to these meetings if and when necessary. Board resolutions and elections are decided by a majority of votes cast. In the event of a tie vote, the Chairman has the casting vote. Resolutions can also be adopted by way of circular letter, provided no member requests oral deliberations. During the 2015 financial year the Board of Directors held nine meetings and the average duration was 4.5 hours.

The duties and powers of the Compensation Committee are presented in the Compensation Report (page 70). The Board of Directors has not established any other committees. At our mid-sized company, the duties typically assigned to standing committees are performed by the Board of Directors as a whole. Moreover, the Executive Board regularly consults with the Chairman and individual directors on an informal basis regarding important aspects of specific topics.

Definition of areas of responsibility

The Board of Directors has the overall responsibility for the management of the company as well as the supervision of the executive management. According to an organisation directive and the accompanying functions chart, the Board of Directors has delegated most of the responsibility for daily business to the CEO. The Board of Directors though, remains responsible for duties that legally cannot be delegated and other important business. These include in particular matters such as business strategy, approval of the budget, decisions with regard to acquisitions and important personnel matters.

Information and control instruments vis-à-vis the Executive Board

Executive management control is exercised primarily through regular reporting by the Executive Board to the Board of Directors, in particular by means of:

- monthly and quarterly financial reports including commentary on the corresponding key figures (order intake, sales revenues, margins, profits, capex, liquidity, working capital);
- information about market and business developments as well as major projects;
- detailed information about market and business developments at every Board meeting, which are occasionally attended by the CEO and CFO and by other members of the Executive Board as required.

In addition, the Chairman of the Board of Directors discusses current developments with the CEO on a regular basis. Walter Fust and Adrian Stürm also exercise further control functions as members of the Supervisory Board of Dörries Scharmann Technologie GmbH and Walter Fust and Prof. Dr. Frank Brinken as members of the Board of Directors of Bumotec SA.

Risk management

As one of the world's leading manufacturers of precision milling machines, the Starrag Group is faced with various risks, with the most important being:

- The weakening of the economic environment in customer markets and also of business cycles could lead to a reduction in demand;
- Misjudgements of developments in customer markets or in the competitive environment could lead to missed business opportunities or losses;
- Failure in research and development and other innovation-based activities could prevent business potential from being realised,
- A lack of availability of financial resources could have an impact on the performance and operations of the Starrag Group and
- Natural occurrences (such as fires) can have an influence on operating activities.

The Board of Directors and management give high priority to the careful handling of strategic, financial and operational risks. The Starrag Group has a holistic risk management process which is analysed every year by management and the Board of Directors, with the following aims being pursued:

- Systematically identifying special risks,
- Establishing processes to monitor, reduce and ideally to prevent risks and
- Finding the right balance between risks and opportunities.

The risk management system is based on a classic risk matrix involving the probability of occurrence and possible extent of damage (identification and classification) and includes internal guidance as well as a risk log, in which operational data as well as action planning for risk management are documented.

The Executive Board appointed a risk management representative for the moderation and implementation of the risk management, which reports directly to the CFO, and assigned one responsible member of the Executive Board to each risk area.

In the annual risk review there is a diligent identification, assessment, analysis and evaluation of risks and appropriate measures are defined to reduce the risks. This information is documented in a group wide risk matrix. The implementation of the measures is monitored by the risk management representative. In business processes with recurring risks the measures are integrated as process steps in the operative processes of the daily business.

On an annual basis, the Executive Board reports nature, extent and assessment of significant risks and the measures taken for risk minimization to the Board of Directors. Risks in accounting and financial reporting are monitored and reduced by an adequate internal control system.

Additional information on financial risk management can be found on page 89.

Internal auditing

In accordance with the simplifications stated in the Swiss Code of Best Practice for Corporate Governance, the Board of Directors has decided not to implement an internal audit.

The codex implies certain simplifications for medium and small companies as well as for companies with active majority shareholders.

Convocation of the Annual General Meeting of shareholders

The Articles of Association contain no provisions on convening General Meetings that deviate from the law. A notice convening a General Meeting must be sent in writing to shareholders at least 20 days before the scheduled date of the General Meeting.

Extraordinary General Meetings are to be called upon resolution of a General Meeting of shareholders or the Board of Directors, or at the request of the auditors, or if shareholders representing at least 3 percent of the share capital request in writing that a General Meeting be called, specifying the agenda items to be discussed and the proposals to be voted on.

The Board of Directors has the right to demand from the applicant all information which might be useful for the assessment of the application for registration. The entry in the share register of a shareholder with the right to vote or a beneficiary can be denied for the following reasons:

The corresponding shares are deemed not to be represented at the General Meeting. After hearing the person in question, the Board of Directors can delete the registration if it resulted from invalid information. The acquirer has to be informed immediately.
