Notes to the Interim Financial Statements (Anhang)

Tornos Holding Ltd.

All figures are presented in thousands of Swiss francs (CHF) unless otherwise stated.

1. Purpose of interim financial statements

These interim financial statements have been prepared in accordance with the Swiss Merger Act and article 960f of the Swiss Code of Obligations in connection to the planned merger with Starrag Group Holding AG, which shall take place retrospectively as of 1.7.2023 depending on the final decision made by the general meeting.

2. Basis of preparation

The financial statements of Tornos Holding Ltd., Moutier are prepared in accordance with the provisions of the Swiss law and the Company's Articles of Incorporation.

For replacement purposes and to ensure the long-term prosperity of the undertaking, additional depreciation and valuation adjustments may be made. For the same purposes, the cancellation of depreciation and valuation adjustments that are no longer justified may be dispensed with.

3. Accounting principles applied in the preparation of the financial statements

Significant balance sheet items are accounted for as follows:

Cash and cash equivalents which include cash in hand, deposits held at call with banks, other short term highly liquid investments with original maturities of three months or less are stated at their nominal amounts.

Group receivables are carried at their nominal value. Impairment charges, if any, are calculated for these assets on an individual basis based on a review and assessment of the recoverability of the outstanding balances. The carrying amount of the asset is reduced through the use of an impairment charge, and the amount of the loss is recognized in the income statement. Subsequent recoveries of amounts previously written off are credited in the income statement and presented separately.

Investments and loans to subsidiaries are recognized at acquisition costs. The carrying amount of the investments and loans are assessed individually after the first recognition on the balance sheet provided that due to their similarity they are not usually combined as a group for valuation. They are reviewed for impairment on a regular basis. Prudence is applied when assessing the valuation. Impairment losses are recognized in the income statement.

Treasury shares are valued at historical acquisition value without subsequent valuation. Gains and losses from disposals of treasury shares, including transaction costs, are recorded directly in retained earnings / accumulated losses.

All assets and liabilities denominated in foreign currencies are translated according to the exchange rates applicable on the balance sheet date. Income and expenses denominated in foreign currencies and all foreign exchange transactions are translated at the exchange rates prevailing on their respective transaction dates. Resulting foreign exchange differences are recognized in the income statement.
